

I am against the provisions of Docket 02-277. I see NO PUBLIC GOOD coming from the changes to broadcast ownership by this proposed rule change. Single corporation ownership of diverse information sources conceviably amounts to no more than a tacit MINISTRY OF INFORMATION sanctioned by the United States. That is exactly how Hitler, and Stalin, and Mussolini came to power - by controlling what the public could see and hear, and thereby what they could think. Free press is at the core of our democracy and it must not be compromised.
